

i-FLO Conveyor >>>
**Horizontal Motion
Distribution Conveyor**

Quality
Made Affordable...

i-FLO is an advanced Horizontal Motion conveyor which moves product via a slow forward and quick return motion. Major benefit is that it helps to minimize product breakage and flavor fall-off while preventing product build up in trays.

SALIENT POINTS

- Servo Driven motion provides optimum product transfer rates.
- Minimize product breakage and flavor fall-off.
- Minimum mechanical parts for easy maintenance.
- Up to 10 Feeder trays can be run in synchronized motion with a single CPU.
- Graphical User Interface to control and diagnose feeding system centrally (Applicable to multi-station overhead feeding system only)
- Product Discharge Gates to feed product onto Multihead weighers or cross feeders.

OPTIONAL FEATURES

- Bi-directional feeding for single feeder tray.
- Customized lengths from 1 m up to 4 m.
